

Border wars: Illinois vs Iowa

By J. Scott Moody and Wendy P. Warcholik – Illinois Policy Institute Senior Fellows

Taxpayers, families and business owners have been fleeing the state for decades, seeking a friendlier environment to put down roots or grow a business. New data from the Internal Revenue Service for the 2010 tax year shows that Illinois had the second-worst loss of people and income nationally.

Illinois had a net loss of more than 49,000 people and nearly \$2 billion in annual income in 2010. Only New York lost more people and income.

Many of those families and businesses jumped the border to Iowa. More than 1,700 people and \$41 million in annual income were lost to Iowa alone.

Illinoisans jump the border for Iowa

Illinois' loss of taxpayers, people and income to Iowa in 2010

	IA to IL	IL to IA	Net change
Taxpayers	3,867	4,761	-894
Taxpayers + dependents	6,889	8,636	-1,747
Total income (in millions)	\$145.6	\$186.7	-\$41.1

Illinois' losses to Iowa are nothing new. Over the course of the years studied, Illinois has suffered a net loss of more than 14,000 people and \$68 million in annual income to Iowa.

Illinoisans have been fleeing to Iowa for decades

Illinois' net loss of taxpayers, people and income to Iowa, 1995-2010

	Net loss to Iowa
Taxpayers	-3,741
Taxpayers + dependents	-14,538
Total income	-\$68.9 mil

Illinois loses one person every 10 minutes. That's because for every four people who leave Illinois, only three enter. The Illinois exodus is a stark reminder that policymakers should consider why people are leaving the state, and where they're going.

Illinois' biggest losses were to Texas and Florida, both zero-income tax states. But it's not only income taxation that drives people out of Illinois. Residents moved to states where union membership is 43 percent lower, death taxes are 71 percent lower, housing costs are 15 percent lower and temperatures are 20 percent higher.

In 2010, Illinois had a net loss of people to 42 states. The top 15 states that gained Illinois residents included all of Illinois' border states, along with four states that don't tax income.

Illinois' loss of taxpayers, people and income to Iowa in 2010

Illinois losing residents

Top 15 states that gained Illinois residents

State	In	Out	Illinois net loss
TEXAS	9,780	17,455	-7,675
FLORIDA	10,016	16,581	-6,565
CALIFORNIA	11,639	16,063	-4,424
INDIANA	14,429	18,555	-4,126
WISCONSIN	10,958	14,931	-3,973
MISSOURI	10,655	12,963	-2,308
COLORADO	3,127	5,307	-2,180
ARIZONA	4,940	7,119	-2,179
GEORGIA	5,003	6,807	-1,804
TENNESSEE	3,706	5,489	-1,783
IOWA	6,889	8,636	-1,747
NORTH CAROLINA	3,618	5,004	-1,386
VIRGINIA	4,003	5,052	-1,049
WASHINGTON	2,675	3,555	-880
KENTUCKY	2,897	3,771	-874

But policymakers have not taken the hint. In the spring of 2014, Illinois lawmakers attempted numerous tax hikes and political maneuvering ahead of fall elections.

While politicians scramble for short-term fixes, businesses and families continue to vote with their feet.

Key findings of this report include:

- **Illinois lost people and income in 2010, the most recent year of IRS data.** Illinois' net loss was 49,142 people and nearly \$2 billion in annual income. The largest net loss of people was to Texas. The largest net loss of income was to Florida.
- **Illinois has lost people and income in every year from 1995-2010.** The state sustained a net loss of 855,196 people and \$35.4 billion in annual income from 1995 through 2010. The top states that gained people from Illinois during this time period were Florida, Indiana, Wisconsin, Texas and Arizona.
- **Illinois is losing the "border wars."** In the 2010 tax year and over the 16 years of the study, Illinois lost people and income to all five of its neighboring states.
- **State and local governments lose billions in tax revenue due to out-migration.** State and local governments lose \$6 billion in annual tax revenue as a result of the 16 years of out-migration highlighted in this study. The compounded loss of tax dollars over 16 years is \$52 billion.
- **Out-migration has accelerated.** U.S. Census Bureau data, which provide a broader view of out-migration, show that the loss of people due to net out-migration increased from 60,000 in 2010 to 70,000 people in 2011. The number of people migrating away from Illinois has remained constant at an elevated level since then.
